Experience Summery

Roles:

Playing role of Designer, Developer and also acted as pseudo project lead.

Responsibilities:

- Migrate SharePoint 2013 sites to SharePoint Online.
- Analyze SharePoint Sites with Power Shell and create Inventory. Segregate the sites on the basis of custom features. Analyze sites in different possible way so that we can migrate with less error.
- Make plan for Share Gate Migration with wave-based process.
- After migration validate the sites through PowerShell Validation script.
- Automate all the user communication and create PowerShell framework.
- Create and set banner for the sites to notify user for the current migration status.
- Handled all the errors in migration and do the same customization as source.
- After migration Track and analyses all Incidents or issues logged against applications to their completion. In case of any ambiguity, reach out to the client and clarify the requirements.
- Actively perform SLA reporting for Enhancement and other operational activities thereby maintaining strict adherence to client commitment.

Roles:

Played a role of Client-Side coordinator, Designer, Developer and also leading a team.

Responsibilities:

- Track and analyse all Incidents or issues logged against applications to their completion. In case of any ambiguity, reach out to the client and clarify the requirements.
- Validate health check parameters of all applications in the portfolio.
- Perform root cause analysis for critical and recurring incidents and provide solution for implementing a permanent/long term resolution of the same.
- Responsible to maintain and support their portal which contains different department's forms and used by all the employees.
- To maintain and keep their work simple I was responsible to give several innovative ideas. On the basis of that we need to use and develop different SharePoint components.
- Get experience to work in SharePoint custom and SharePoint Designer workflow, Web Parts, SSRS reports, InfoPath Forms. Responsible to handle client side situations and lead the team to fulfil the Project requirements.
- Used to provide inputs for build and deployment of automation strategy.
- Mentor and train new Infosys team members on functional and technical scope of project Request Management.
- To fulfil client requirements, I was responsible to create different SharePoint components (Web Parts, Event receivers, InfoPath forms and custom SharePoint development)

Declaration:

I hereby declare that above mentioned details are true as per my knowledge.

Place: Bangalore

Yours faithfully
Krishna Gopal Bhaumik
